

$$\Delta t = -28.07$$

$$[-31.46, -21.58]$$

A histogram showing the distribution of Δt . The data is concentrated in a narrow peak around -28.07. A smooth, dark gray Gaussian curve is overlaid on the histogram, which is colored teal. The x-axis is labeled with -25, 0, and 25.

$$\tau = 0.37$$

$$[0.18, 1.47]$$

A histogram showing the distribution of τ . The data is concentrated in a narrow peak around 0.37. A smooth, dark gray Gaussian curve is overlaid on the histogram, which is colored teal. The x-axis is labeled with 0 and 2.

$$\Delta p = 0.19$$

$$[0.11, 0.30]$$

A histogram showing the distribution of Δp . The data is concentrated in a narrow peak around 0.19. A smooth, dark gray Gaussian curve is overlaid on the histogram, which is colored teal. The x-axis is labeled with 0.0 and 0.2.
